

VOC-COMPLIANT

## Touch-Up Glaze

### SECTION 1. PRODUCT AND COMPANY IDENTIFICATION

**PRODUCT NAME:** PORC-A-FIX VOC  
**PRODUCT CLASS:** SOLVENT THINNED PAINT  
**PRODUCT TYPE:** LIQUID  
**COLOR:** White  
**MANUFACTURER:** Fixture-Fix LLC. 25 Perry Avenue suite #1, Norwalk.  
 CT 06850, USA  
 www.fixture-fix.com

**Emergency Telephone Number(s):** 718-Fixture (349-8873) / 1(516) 456-6978

### SECTION 2. HAZARDS IDENTIFICATION

#### CLASSIFICATION

This chemical is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200)

|                                                                                 |
|---------------------------------------------------------------------------------|
| <b>Classification of the substance or mixture:</b> CARCINOGENICITY - Category 2 |
|---------------------------------------------------------------------------------|

#### GHS LABEL ELEMENTS

**Hazard pictograms**

**Signal word:** Warning

**HAZARD STATEMENTS:** Suspected of causing cancer.

**HAZARD STATEMENTS:** Suspected of causing cancer.

#### PRECAUTIONARY STATEMENTS

**Prevention:** Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection.

**Response:** if exposed or concerned: Get medical advice or attention.

**Storage :** Store locked up.

**Disposal:** Dispose of contents and container in accordance with all local, regional, national and international regulations.

**Supplemental Label Elements:** WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. FOR INDUSTRIAL USE ONLY.

This product contains a TSCA regulated chemical. See Section 15 of the US SDS for details.

Please refer to the SDS for additional information. Keep out of reach of children. Do not transfer contents to other containers for storage.

**Hazards Not Otherwise Classified (Hnoc):** None known.

**Hazards identified when used:** No known significant effects or critical hazards.

### SECTION 3. COMPOSITION / INFORMATION ON COMPONENTS

**Substance/mixture :** Mixture

**Other means of identification:** Not available.

| CAS number/other identifiers |             |             |
|------------------------------|-------------|-------------|
| Ingredient Name              | % by weight | Identifiers |
| Titanium dioxide             | ≤3          | 13463-67-7  |
| Benzophenone                 | ≤0.3        | 119-61-9    |

**Any concentration shown as a range is to protect confidentiality or is due to batch variation.**

**There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.**

**Occupational exposure limits, if available, are listed in Section 8.**

### SECTION 4. FIRST AID MEASURES

| Description of necessary first aid measures |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Eye contact</b>                          | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes and get medical attention.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Inhalation</b>                           | Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth to mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. The exposed person may need to be kept under medical surveillance for 48 hours. |
| <b>Skin contact</b>                         | Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Ingestion</b>                            | Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.                                                                 |

### **Most important symptoms/effects, acute and delayed**

#### **Potential acute health effects**

**Eye contact:** No known significant effects or critical hazards.

**Inhalation:** No known significant effects or critical hazards.

**Skin contact:** No known significant effects or critical hazards.

**Ingestion:** No known significant effects or critical hazards.

#### **Over-exposure signs/symptoms**

**Eye contact:** No specific data.

**Inhalation:** No specific data.

**Skin contact:** No specific data.

**Ingestion:** No specific data.

### **Indication of immediate medical attention and special treatment needed, if necessary**

**Notes to physician:** In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

**Specific treatments:** No specific treatment.

**Protection of first-aiders:** No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

### **See toxicological information (Section 11)**

## **SECTION 5. FIRE-FIGHTING MEASURES**

### **Extinguishing media**

**Suitable extinguishing media:** Use an extinguishing agent suitable for the surrounding fire.

**Unsuitable extinguishing media:** None known.

**Specific hazards arising from the chemical:** In a fire or if heated, a pressure increase will occur and the container may burst.

**Hazardous thermal decomposition products:** Decomposition products may include the following materials: carbon dioxide, carbon monoxide, metal oxide/oxides, nitrogen oxides, halogenated compounds.

**Special protective actions for fire-fighters:** Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

**Special protective equipment for fire-fighters:** Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

**Remark:** Flammable liquid.

## SECTION 6. ACCIDENTAL RELEASE MEASURES

### **Personal precautions, protective equipment and emergency procedures**

**For non-emergency personnel:** No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

**For emergency responders:** If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".

**Environmental precautions:**        **This product contains a TSCA regulated chemical. See Section 15 of the US SDS for details.** Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

### **Methods and materials for containment and cleaning up**

**Small spill:** Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

**Large spill:** Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations.

## SECTION 7. HANDLING AND STORAGE

### **Precautions for safe handling**

**Protective measures:** Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not swallow. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

**Advice on general occupational hygiene:** Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

**Conditions for safe storage, including any incompatibilities:** Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### Control parameters

#### Occupational exposure limits (OSHA United States)

| Ingredient Name  | CAS #      | Exposure Limits                                                                                                                                                                                                                                                                            |

No exposure indices known.

#### Biological exposure indices (Canada)

No exposure indices known.

#### Biological exposure indices (Mexico)

No exposure indices known.

|                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Appropriate engineering controls</b> | If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.                                                                                                                                                                                             |
| <b>Environmental exposure controls</b>  | <p><b>This product contains a TSCA regulated chemical. See Section 15 of the US SDS for details.</b></p> <p>Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.</p> |

| <b>Individual protection measures</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Hygiene measures</b>               | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.                                                                                                                                         |
| <b>Eye/face protection</b>            | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with sideshields.                                                                                                                                                                                                                                                 |
| <b>Skin protection</b>                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Hand protection</b>                | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. |
| <b>Body protection</b>                | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear antistatic protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.                                                                                                                                                                                     |

|                               |                                                                                                                                                                                                                                                                          |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Other skin protection</b>  | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.                                                        |
| <b>Respiratory protection</b> | Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. |

## SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

### Appearance

**Physical state:** Liquid.  
**Color:** White.  
**Odor:** Not available.  
**Odor threshold:** Not available.  
**pH:** 8.8

**Melting point/freezing point:** Not available.

**Boiling point or initial:** 100°C (212°F)  
**boiling point and boiling range**

**Flash point:** Closed cup: Not applicable  
**Evaporation rate:** 0.09 (butyl acetate = 1)  
**Flammability:** Not available.

**Lower and upper explosion limit/flammability limit:** Lower: 0.6%  
 Upper: 4.2%

**Vapor pressure:** 2.9 kPa (17.5 mm Hg)  
**Relative vapor density:** 1 [Air = 1]  
**Relative density:** 1.04  
**Density:** 1.04 g/cm<sup>3</sup>

| Solubility(ies) |             |
|-----------------|-------------|
| Media           | Result      |
| cold water      | Not soluble |

## Appearance

|                                                |                                                                                                                                                              |
|------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Partition coefficient: noctanol/ water:</b> | Not applicable.                                                                                                                                              |
| <b>Auto-ignition temperature:</b>              | Not available.                                                                                                                                               |
| <b>Decomposition temperature:</b>              | Not available.                                                                                                                                               |
| <b>Viscosity:</b>                              | Dynamic (room temperature): Not available.<br>Kinematic (room temperature): Not available.<br>Kinematic (40°C (104°F)): <20.5 mm <sup>2</sup> /s (<20.5 cSt) |
| <b>Molecular weight:</b>                       | Not applicable.                                                                                                                                              |

## Particle characteristics

|                              |                 |
|------------------------------|-----------------|
| <b>Median particle size:</b> | Not applicable. |
| <b>Heat of combustion:</b>   | 0.789 kJ/g      |

## SECTION 10. STABILITY AND REACTIVITY

|                                           |                                                                                                      |
|-------------------------------------------|------------------------------------------------------------------------------------------------------|
| <b>REACTIVITY</b>                         | No data available .                                                                                  |
| <b>CHEMICAL STABILITY</b>                 | Stable under normal conditions.                                                                      |
| <b>POSSIBILITY OF HAZARDOUS REACTIONS</b> | Under normal conditions of storage and use, hazardous reactions will not occur                       |
| <b>CONDITIONS TO AVOID</b>                | No specific data.                                                                                    |
| <b>INCOMPATIBLE MATERIALS</b>             | No specific data.                                                                                    |
| <b>HAZARDOUS DECOMPOSITION PRODUCTS</b>   | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

## SECTION 11. TOXICOLOGICAL INFORMATION

### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name             | Result                                                                              |
|-------------------------------------|-------------------------------------------------------------------------------------|
| <b>Benzophenone</b>                 | <b>Rat - Oral - LD50</b><br>>10 g/kg<br><b>Rabbit - Dermal - LD50</b><br>3535 mg/kg |
| <b>Conclusion/Summary [Product]</b> | Not available.                                                                      |

### Skin corrosion/irritation

| Product/ingredient name             | Result                                                                                                                    |
|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------|
| <b>Titanium Dioxide</b>             | <b>Human - Skin - Mild irritant</b><br>Duration of treatment/exposure: 72 hours<br>Amount/concentration applied: 300 ug l |
| <b>Conclusion/Summary [Product]</b> | Not available.                                                                                                            |

### Serious eye damage/eye irritation

Not available

|                                     |                |
|-------------------------------------|----------------|
| <b>Conclusion/Summary [Product]</b> | Not available. |
|-------------------------------------|----------------|

**Respiratory corrosion/irritation:** Not available

**Conclusion/Summary [Product] :** Not available.

**Respiratory or skin sensitization:** Not available

### Skin

**Conclusion/Summary [Product]:** Not available.

### Respiratory

**Conclusion/Summary [Product]:** Not available.

**Germ cell mutagenicity:** Not available

**Conclusion/Summary [Product] :** Not available.

**Carcinogenicity:** Not available

**Conclusion/Summary [Product] :** Not available.

### Classification

| Product/ingredient name | OSHA | IARC | NTP |
|-------------------------|------|------|-----|
| <b>Titanium Dioxide</b> | -    | 2B   | -   |
| <b>Benzophenone</b>     | -    | 2B   | -   |

**Reproductive toxicity:** Not available.

**Conclusion/Summary [Product] :** Not available.

### Specific target organ toxicity (single exposure)

Not available

### Specific target organ toxicity (repeated exposure)

| Product/ingredient name | Result                                                          |
|-------------------------|-----------------------------------------------------------------|
| <b>Benzophenone</b>     | SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2 |

### Aspiration hazard

Not available.

### Information on the likely routes of exposure

Not available.

### Potential acute health effects

|                     |                                                   |
|---------------------|---------------------------------------------------|
| <b>Eye contact</b>  | No known significant effects or critical hazards. |
| <b>Inhalation</b>   | No known significant effects or critical hazards. |
| <b>Skin contact</b> | No known significant effects or critical hazards. |
| <b>Ingestion</b>    | No known significant effects or critical hazards. |

### Symptoms related to the physical, chemical and toxicological characteristics

|                     |                  |
|---------------------|------------------|
| <b>Eye contact</b>  | No specific data |
| <b>Inhalation</b>   | No specific data |
| <b>Skin contact</b> | No specific data |
| <b>Ingestion</b>    | No specific data |

### Delayed and immediate effects and also chronic effects from short and long term exposure

#### Short term exposure

|                                    |                |
|------------------------------------|----------------|
| <b>Potential immediate effects</b> | Not available. |
| <b>Potential delayed effects</b>   | Not available. |
| <b>Long term exposure:</b>         |                |
| <b>Potential immediate effects</b> | Not available. |
| <b>Potential delayed effects</b>   | Not available. |

**Potential chronic health effects:** Not available.

Conclusion/Summary [Product] : Not available.

|                              |                                                                                       |
|------------------------------|---------------------------------------------------------------------------------------|
| <b>General</b>               | No known significant effects or critical hazards                                      |
| <b>Carcinogenicity</b>       | Suspected of causing cancer. Risk of cancer depends on duration and level of exposure |
| <b>Mutagenicity</b>          | No known significant effects or critical hazards.                                     |
| <b>Reproductive toxicity</b> | No known significant effects or critical hazards.                                     |

### Numerical measures of toxicity: Acute toxicity estimates

| <b>Product / ingredient name</b> | <b>Oral (mg/kg)</b> | <b>Dermal (mg/kg)</b> | <b>Inhalation (gases) (ppm)</b> | <b>Inhalation (vapors) (mg/l)</b> | <b>Inhalation (dusts &amp; mists) (mg/l)</b> |

**Conclusion/Summary [Product] :** Not available.

**Persistence and degradability:** Not available.

**Conclusion/Summary [Product] :** Not available.

### Bioaccumulative potential

| Product/ingredient name | LogPow | BCF   | Potential |
|-------------------------|--------|-------|-----------|
| <b>Benzophenone</b>     | -      | 12.02 | Low       |

### Mobility in soil

#### Soil/Water partition

**coefficient:** Not available.

#### Other adverse effects

No known significant effects or critical hazards.

### SECTION 13. DISPOSAL CONSIDERATIONS

#### Disposal methods:

**This product contains a TSCA regulated chemical. See Section 15 of the US SDS for details.**

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### SECTION 14. TRANSPORT INFORMATION

#### Special precautions for user:

Multi-modal shipping descriptions are provided for informational purposes and do not consider container sizes. The presence of a shipping description for a particular mode of transport (sea, air, etc.), does not indicate that the product is packaged suitably for that mode of transport. All packaging must be reviewed for suitability prior to shipment, and compliance with the applicable regulations is the sole responsibility of the person offering the product for transport. People loading and unloading dangerous goods must be trained on all of the risks deriving from the substances and on all actions in case of emergency situations.

**Transport in bulk according  
to IMO instruments:** Not available.

**Proper shipping name:** Not available.

## SECTION 15. REGULATORY INFORMATION

### U.S. Federal regulations

**TSCA 5(a)2 final significant new use rules:** Sodium Nitrite

| List name                                    | Name on List                                                         | Notes           |
|----------------------------------------------|----------------------------------------------------------------------|-----------------|
| TSCA 5(a)2 - Final significant new use rules | Sodium Nitrite<br>(Nitrites of Alkali Metals<br>(Group IA elements)) | 40 CFR 721.4740 |

**TSCA 5(e) substance consent order:** Fluoropolymer

| List name                            | Name on List                                                                                                | Notes |
|--------------------------------------|-------------------------------------------------------------------------------------------------------------|-------|
| TSCA 5(e) - Substances consent order | Partially fluorinated alcohol, reaction products with phosphorus oxide (P2O5), ammonium salts (PROVISIONAL) |       |

### California Prop. 65

**WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

### International regulations

**Montreal Protocol:** Not listed.

**Stockholm Convention on Persistent Organic Pollutants:** Not listed.

### International lists:

Australia inventory (AIIIC): Not determined.

China inventory (IECSC): Not determined.

Japan inventory (CSCL): Not determined.

Japan inventory (ISHL): Not determined.

Korea inventory (KECI): Not determined.

New Zealand Inventory of Chemicals (NZIoC): Not determined.

Philippines inventory (PICCS): Not determined.

Taiwan Chemical Substances Inventory (TCSI): Not determined.

Thailand inventory: Not determined.

Turkey inventory: Not determined.

Vietnam inventory: Not determined.

## SECTION 16. OTHER INFORMATION

HAZARDOUS MATERIAL INFORMATION SYSTEM (U.S.A.)

|                 |   |   |
|-----------------|---|---|
| HEALTH          | * | 3 |
| FLAMMABILITY    |   | 0 |
| PHYSICAL HAZARD |   | 0 |

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

**Caution:** HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

#### Procedure used to derive the classification

| Classification                      | Justification      |
|-------------------------------------|--------------------|
| <b>CARCINOGENICITY - Category 2</b> | Calculation method |

#### History

Date of printing: 9/7/2025

Date of issue/Date of revision: 9/7/2025

Date of previous issue: 8/30/2025

Version: 4.03

Key to abbreviations:

ATE = Acute Toxicity Estimate

BCF = Bioconcentration Factor

GHS = Globally Harmonized System of Classification and Labelling of Chemicals

IATA = International Air Transport Association

IBC = Intermediate Bulk Container

IMDG = International Maritime Dangerous Goods

LogPow = logarithm of the octanol/water partition coefficient

MARPOL = International Convention for the Prevention of Pollution From Ships, 1973

as modified by the Protocol of 1978. ("Marpol" = marine pollution)

N/A = Not available

SGG = Segregation Group

UN = United Nations

**NOTICE TO READER**

It is recommended that each customer or recipient of this Safety Data Sheet (SDS) study it carefully and consult resources, as necessary or appropriate, to become aware of and understand the data contained in this SDS and any hazards associated with the product. This information is provided in good faith and believed to be accurate as of the effective date herein. However, no warranty, express or implied, is given. The information presented here applies only to the product as shipped. The addition of any material can change the composition, hazards and risks of the product. Products shall not be repackaged, modified, or tinted except as specifically instructed by the manufacturer, including but not limited to the incorporation of products not specified by the manufacturer, or the use or addition of products in proportions not specified by the manufacturer.
